

GAIIA

GAIIA

By Hares Youssef

Who is Hares Youssef?

Hares Youssef was born in Latakia, Syria in 1964. He is the founder of the GAIIA Project, which has resulted from the accumulation of his personal experiences and the belief we are building a digital future. As an author, he released the Kindle version of his book “GAIIA” on September 10, 2021. Hares believes that each of us is born with unique talents and gifts, but everything interferes with our lives – including politics, economics, religion, education, and more. The result was “GAIIA,” a philosophical and futurological novel that tells the story of alternative models for developing our planet.

“We are building a digital future. Everything we devise and invent, we conceive as a technology that can be implemented in the near future. In a sense, we are laying a new channel for progress, for those changes that the digital revolution brings to our world literally in front of our eyes. These changes are radical and irreversible, and we can’t afford to miss a single day.”

–Hares Youssef

A Synopsis

With a wide range of interdisciplinary knowledge, Hares Youssef presents his philosophical, scientific, and economic ideas in the form of a fascinating science fiction novel. The reader will go on a mind-bending journey where they will meet Nikola Tesla, Joseph Stalin, and the prominent figures who make history today.

In this engrossing adventure, the reader will recognize the fact that Earth has a twin planet and that all things in the universe exist in pairs. They will learn about the role of language in the process of human self-knowledge, the three stages of the development of civilization, how architecture becomes philosophy, and finally the lunar generation and the mysterious Paideums which may come in nightdreams to the sage Plato.

GALLA predicts the behavior of a world ready for radical change. Predicting means revealing aspects of reality that tomorrow will mark the cornerstone of historical events.

GALLA is a visionary and inspirational science fiction novel with a mind-bending storyline that is perfect for readers who are willing to look ahead, challenge their imbued vision of the world system, and be a catalyst for change

Order your copy now and get ready to embark on a fascinating and life-changing journey.

Time to Open Up Your Mind
(Reviewed November 11, 2021)

“Laden with thought-provoking and mind-boggling ideas, this book presents a new reality which, although open right in our eyes, we need to open our creativity and intellectual freedom to grasp it. Initially, I was unsure of what to expect from the book, but by the time I read the last word, I felt that my life has been transformed unequivocally in a manner that I cannot possibly articulate verbally. If you are craving to understand yourself better, and have a more explorative view of our society and human life, this book is a MUST READ. With its unique element of explaining its ideas through science fiction format, it ensures you never get bored and allows you to be actively engaged to the end.”

–Infinity

Transformative (Reviewed November 13, 2021)

“Gaiia is one of the most transformative books that I have come across, not just this year but in my entire life. The book provides transitional tips and guides that go a long way in impacting how you think about life and how you can enjoy your intellectual free- dom. The author is an expert in the human life sphere and this enables him to express tips that aim to change our ways of life by enhancing the global system of values and creating within us the urge to embrace a creative thinking process.”

–TrizahKelvin

Amazing Author (Reviewed November 12, 2021)

"In this book, the author expresses action-based thoughts that people can utilize to test their cognitive flexibility. Armed with practical tips and transformational potential, the book helps you to embrace creative thinking by going beyond logical constraints. The book impacted me positively and I am already planning on how to start exercising the tips I learned. I will be looking forward to reading more books by this amazing author."

The Gaiia Foundation researches humanity's ability to develop harmoniously and create an information infrastructure for the economy and communications of the future.

Current and Upcoming Projects

In Progress:

This initiative names our planet and recognizes it as a living being with legal status and the right to vote in the UN, on an equal footing with any state. Furthermore, we propose to give the planet a single name that sounds the same in all languages, for example, Gaiia. This initiative includes the right to clean air in the Universal Declaration of Human Rights as Right No. 1 (Goal 18 of the adopted UN Sustainable Development Goals).

In Progress:

A project to transform the economy and create an ecological and economic system based on an understanding of the energy value of life. HERMES - Human Energy Resources Machinery Ecosystem - is a system that balances the flow of resources in the economy; its 'digital brain.'

Not Started:

Paideums are a system of children's paradise where children have the opportunity to reveal their inner potential.

Not Started:

The Gaiia Traffic system is a navigation system that requires all car drivers to provide complete information about the route of their journey so that the internal algorithms of the system can prevent traffic jams and road accidents.

In Process:

A film adaptation of the Gaia book, video,
etc.

In Process:

Books, the Gaia Magazine, educational
projects, research, the Gaia Animation
Centre

Not Started:

An analytical centre that will include leading economists, thinkers, scientists, etc., whose task will be to solve the global problems facing humanity.

Not Started:

A system of social communication that forms the basis of the idea of the total digitalisation of society. The aim of the system is to generate a political elite.

Not Started:

A communication platform that generates capital from data; the world's first social network where any action carried out in conditions of absolute transparency will become an economic transaction.

Not Started:

A new app and social platform that will bring people together in their homes – on different levels: entrance area, house, yard, block, microdistrict.

Not Started:

The Creative Space for artists, musicians, sculptors, photographers, architects, theater and film directors, etc., where cultural and educational events are held: concerts, exhibitions, training, master classes, lectures, discussions, creative meetings for the exchange of experience and ideas.
